Choogle

07.13.2020

UofA Coding BootCamp Project 3 Team Members:
Kate Meersman, Marcus Travis, Danny Molina-Power, Mike Zlotkowski.

Overview

The User can utilize Choogle as a secure location to save your favorite documents and cheat sheets for coding or whatever you need to save to your personal notes. The User will also be able to access our favorite bookmarked links to development sites as a new developer going down the endless search for documentation, will point you in the right direction.

Future Development Goals

1. Google Search Bar Implemented.
2. Ability to save Bookmarked Search to Notes.
3. Share links with your Developer Friends.

# Specifications

CHOOGLE GITHUB

User Story

As a Developer, I WANT to be able to easily access documents and code resources in one location SO THAT I can easily find information for errors, debugging, and general knowledge.
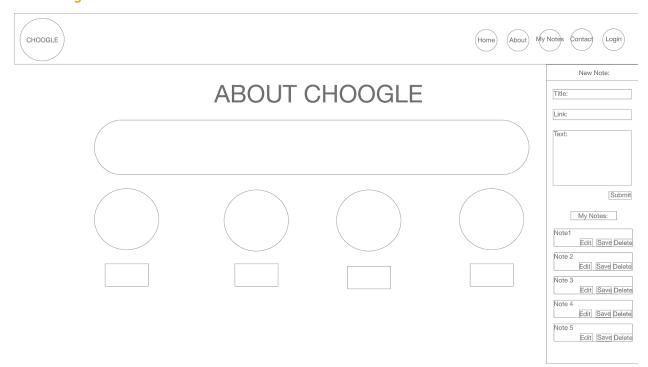

Built With

1. HTML & CSS
